Getting cross-eyed. Working on figures for appendices. Making changes to report based on figures. Error on OH file and plots. I'll get with Ken and line those out. It will change summary of analysis in app for the operational plot and operational gradient plot. It will also change the figures in the attached file for App H. I'm still plugging away with Cleburne.

I also attached the seismicity file I've been working with. Nancy, did your version change since you sent the last one?

According to Google:

No period after et, but must have a period after al. in et al.

They also don't use a comma between the name and et al.

I've made the changes in the report and figures. Please keep in mind as you add new references.

Thanks,
Susie
